

International Urban Cooperation Project (IUC Asia)

Introduction of Chinese pilot cities

2018.06.07

IUC Pilot Cities

Chinese Pilot Cities 2014 - 2018

2018 Kunming, Haikou, Yantai, Liuzhou, Weinan
2017 Chongqing, Zhengzhou, Changchun, Longyan, Shantou
2014-2016 Tianjin, Wuhan, Chengdu, Guangzhou

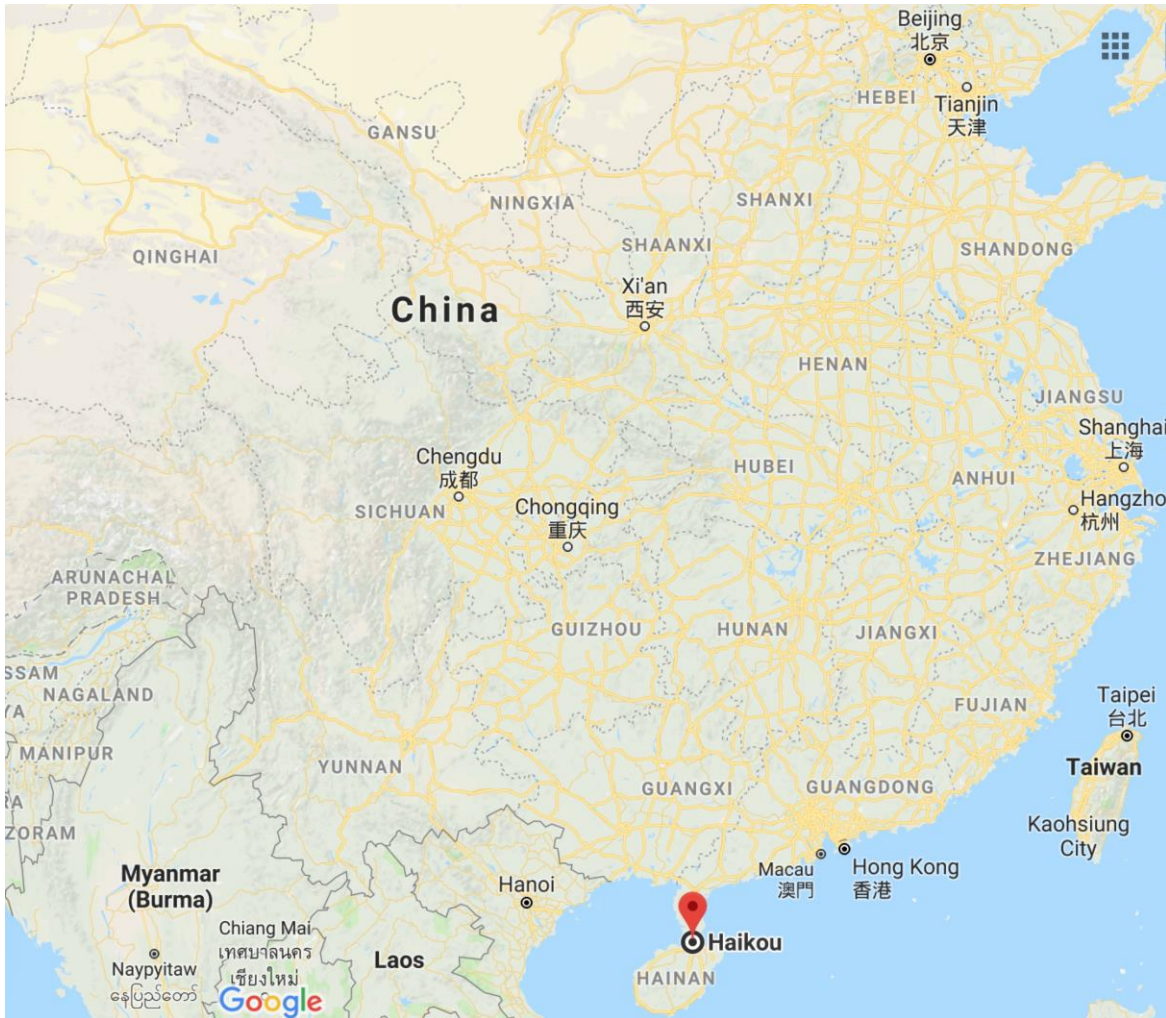

Kunming (Yunnan province)

Main features

- Capital city of Yunnan province, with a total population of 6.7 million and an area of 21,473km²
- 2017, the city' s GDP totaled 485.8 billion RMB, GDP per capita at 10,600 USD. It has a municipal budget at 56 billion RMB.
- Main industries:
 - Machinery, metal processing and tobacco, tourism
 - Also also one of the biggest exhibition centers in China
- **Interested sector for cooperation with EU cities**
 - Industry cooperation: new-generation IT, bio-medicine, work with innovation centers/R&D centers in EU to promote technology transfer
 - International exhibitions and conferences, tourism, health care
 - Smart and ecological city development

Haikou (Hainan province)

Main features

- Capital city of Hainan province, political, economic, cultural and transportation center of the province.
- Total population of 2.27 million and an area of 2305 km²
- In 2017, the city's GDP totaled 139 billion RMB, GDP per capita at 9728 USD. It has a municipal budget at 39 billion RMB.
- Main industries: Agriculture, fishery, machinery, international conference & exhibition, health and tourism, etc.
- Recent policy boost: Free Trade Port

Interested sector for cooperation with EU cities

- Industry cooperation: machinery and high-tech sectors
- International exhibitions and conferences: ocean-economy related topics
- Vocational education exchange and cooperation with EU countries
- Ecological protection
- High-end medical care and tourism

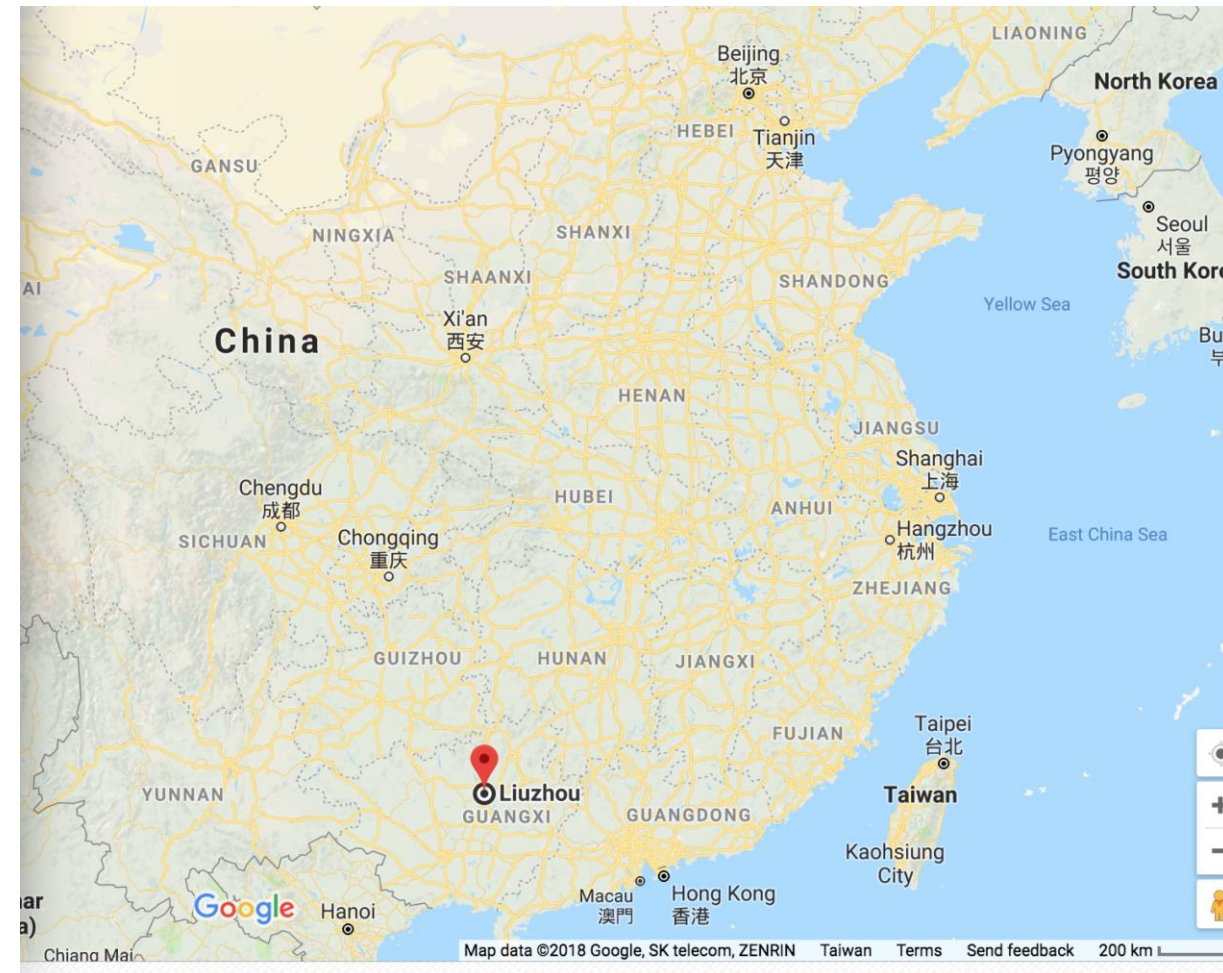

Liuzhou (Guangxi province)

Main features

- Liuzhou is the second largest city and the most important industrial city of Guangxi province. Population of 4 million, an area of 18,600 km², and urbanization rate at 64%
- In 2017, the city' s GDP totaled 275.6 billion RMB, and GDP per capita at 11,055 USD. The city has a municipal budget at 40 billion RMB in 2017.
- Main industries include automotive (one of the five automotive cities in China), machinery, metal processing, medical sectors and chemical industry.

➤ Interested sector for cooperation with EU cities

- Industry cooperation: IT, new materials, new energy, modern logistics. Smart equipment, automobile
- Renewable energy and environment protection
- International education and training
- Sino-EU Strategic Cooperation Demonstration Zone in Liudong New District: technology transfer and low-carbon ecological city development

Yantai (Shandong province)

Main features

- Yantai is the second largest industrial city in Shandong province, next to Qingdao.
- Population of 7 million, and a total land area of 13,756 km².
- In 2017, the city's GDP totaled 734 billion RMB, GDP per capita at 14812 USD. It has a municipal budget of 57 billion RMB.
- Main industries: machinery, equipment, automobiles and spare parts, electronics and information, etc. Emerging industries include new materials, high-end equipment, etc.

➤ Interested sector for cooperation with EU cities

- Industry cooperation: automobile, new materials, ICT, machinery and high-tech manufacturing
- Port logistics and trade, blue economy (ocean-related industries)
- Circular economy, renewable energy and environment protection
- International education

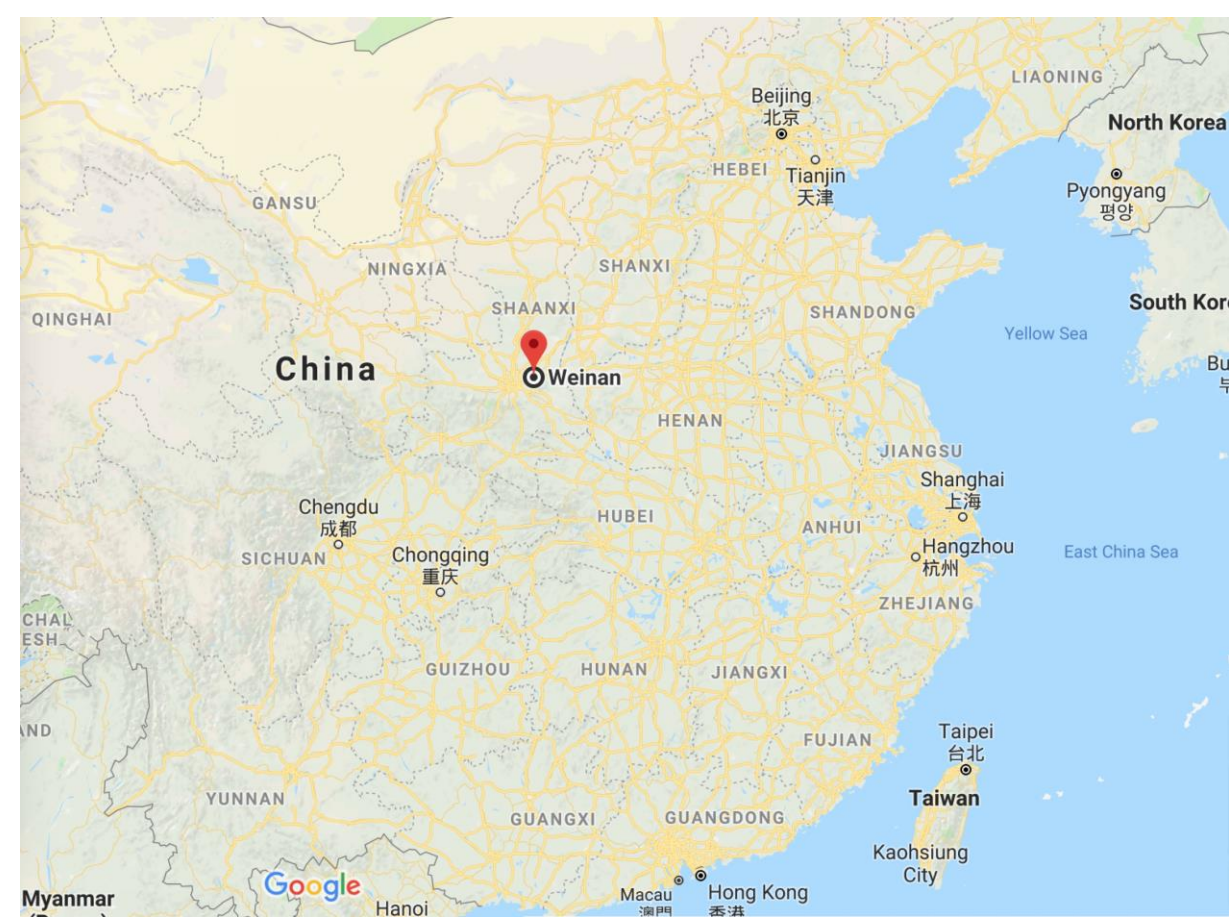

Weinan (Shaanxi province)

Main features

- Weinan is the 2nd biggest city of Shaanxi province in terms of population. It has a total population of 5.8 million and an area of 13,134 km²
- In 2017, the city' s GDP totaled 165.7 billion RMB, GDP per capita at 4,877 USD. It has a municipal budget of 7.2 billion RMB.
- Important agricultural base in China.
- Main industries: metal and food processing, energy and chemical industry.

➤ Interested sector for cooperation with EU cities

- Industry cooperation: high-end manufacturing and high-tech sectors
- Sustainable agriculture
- Clean energy and new-energy vehicles
- International education

Cooperation Areas

Cooperation areas related to Sustainable Development Goals

- ① Smart city
- ② Innovation
- ③ Industry 4.0
- ④ Education and training
- ⑤ Urban regeneration
- ⑥ Green cities/ Low-carbon
- ⑦ Circular economy
- ⑧ Health care

Cooperation Projects

1

Business
facilitation

EU-China Technology
Cooperation Platform
Industry 4.0

2

Smart City

EU-China Smart-City
Pilot District

3

Belt-Road Urban
Connection

Key Hubs of EU-China
Railway Connection

4

Industry 4.0

EU-China High-end
Manufacturing Zone

5

Innovation

Incubation center
R&D center
University Enterprise
Center

“Cities will actively support the IUC project ... and delivering results in fields such as, *inter alia*, **sustainable and integrated urban development, mobility, smart cities and technological innovation, use of alternative financial instruments, industrial upgrading, low carbon development and energy efficiency, and people-to-people exchanges**” IUC Joint Declaration on 31st May in Brussels
