24 Buildings in operation

1 Building under construction

99 companies and institutions

Employment: 2.620 Employees (49% in research activities). 4.966 in the aggregate, including 2.251 employees from the Hospital)

Investment made: More than 700 Millions of Euros.

Enlargement of the Park: In the writing phase of the Partial Plan.

24栋正在运营的大楼

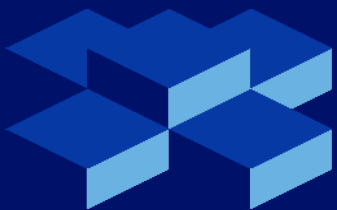

1栋在建的大楼

99家公司和研究所

雇用: 2620名员工(49%从事研究活动)。总计4966名人员, 包括来自医院的2251名员工)

投资: 超过7亿欧元。

扩建公园: 处于部分计划的撰写阶段

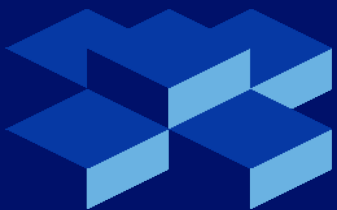

WHAT WE HAVE:

THE PROPOSAL is based on the concept of Platform of the social utility of knowledge and scientific achievement in the field of bio-health.

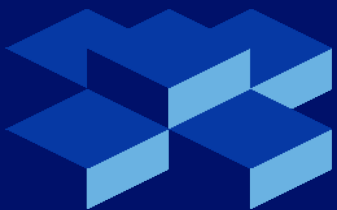

Composed by:

- a) *Observatory of Knowledge, Innovation and Technology Transfer*
- b) *Highly competitive Biosanitary Research Centers integrated by researchers.*
- c) *Andalusian Public Foundation for Biosanitary Research Eastern Andalusia (FIBAO) in translational platforms.*
- d) *University public hospitals with a state-of-the-art sanitary infrastructure, considered of higher rank within the Andalusian Public Health System, as well as highly competitive companies in the field of health at a national and an European level.*
- e) *Clinical Trials Units*

WHAT WE OFFER:

- We propose to collaborate with Kuming in validating the talent generated in the healthcare, business and society through pharmacological, technological developments, medical and laboratory devices to promote therapeutic tools and transfer them to the industry.
- ***Also, we propose to transfer our management model of our TechPark, creating a new alliance and new disruptive markets in BioTech & BioMedicine in the international markets.***
- Designing, developing and testing new drugs, laboratory products, diagnostic kits, utility models and prototypes - but also something so important in this area: its safety and efficacy .

WHAT WE ARE CURRENTLY WORKING:

-We are developing the **Second Phase of the Park**, linked to the Cuadruple Helix Strategy for Andalusia.

- *We are developing a **new concept of Smart Industrial Park**, with an holistic integration in the City Ecosystem*

- Together with the Scientific & Tech Parks in Spain (under the umbrella of APTE) **we are developing a private Blockchain for SMEs and companies in R+D sectors** with the support of Telefonica. We also coordinates the national implementation of these nodes around Spain.

- And also we are developing **new strategies for translational medicine platforms and european networks** to use ICTs, Big Data, AI and Machine Learning to develop new tools and drugs to fight against cancer, Alzheimer, genetics deseases and rare illness.

Thanks!
