

Smart Cities and Blockchain Innovations

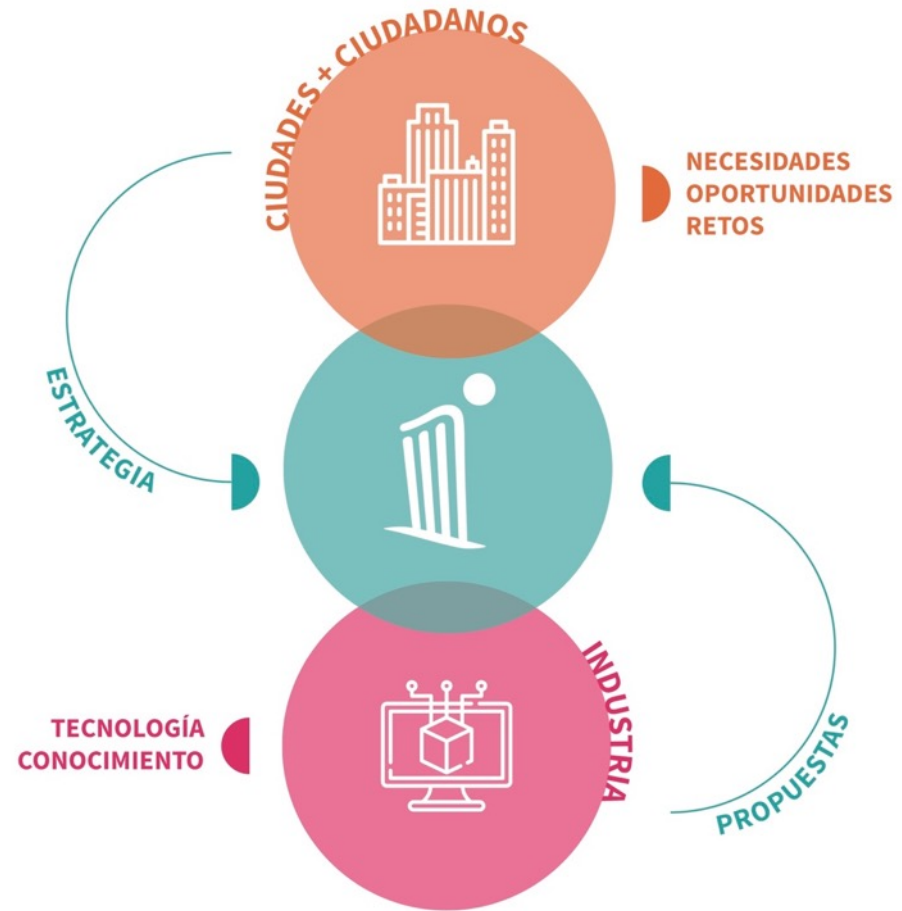

Daniel GONZALEZ BOOTELLO
Director General

The SMART CITY CLUSTER

An Alliance of 120+
members of the
Smart Cities industry

Helping Cities become
Better Places since
2014

Local Government is
an **extremely difficult game**

Competitors **need to be attractive** in
order to avoid being obliterated by
better performers in their category

We are going to describe how the
Blockchain helps solve this problem

An aerial photograph of a city at night, showing numerous illuminated skyscrapers and buildings, with a river or waterway visible in the foreground.

Blockchain Digital Reality

Digitalization has taken over the World, to the point where physical and digital realities are blending into one

At this point:

-  Multiple-parameter sensing
-  Big data platforms
-  Expert systems and Artificial Intelligence tools to perform Analyses
-  Decision Support Systems
-  Assisted Management at all levels – from O&M to Political

Blockchain provides integrity and security to the data, ensuring proof of authenticity to processes and therefore, legal validity enters the playing field

Let's talk

We know how to do it
and we can help you
get there
